Task Assignments:

Task Description	Assigned to
Make Privacy Policy/Terms of Service	Spencer
SCRUM Meeting Document/	Zachary
Images for website(frontend)	Benson
Admin Dashboard	Luke
Twitter OAuth	Asim
Login backend	Luke

Minutes from Previous Meeting

Last meeting we focused on divvying up our presentation on our web application to show to the teaching staff (shareholders). We divided up our presentation with Zach focusing on introducing the team and web application and the problem it aims to solve. Spencer focused on the different APIs we are using and their role in this project. It was then transitioned to Asim, who talked about the frontend design and the overall user interface. Followed by Luke talking about the backend and how it stores user credentials/tokens. That covered where our project was at the moment, so Benson was tasked with explaining the features that we plan on implementing in the future. After everyone's role was assigned for the presentation, we made plans for a rehearsal before the presentation.
